Why attend

Agile methods help teams deliver value in small increments, respond to change and keep stakeholders engaged. This practical course covers agile principles, the Scrum framework with its roles, events and artefacts, Kanban flow management, user stories and estimation, and how to apply agile in organisations that still need governance and reporting.

Agile is often adopted in name only. You will learn how to apply Scrum and Kanban properly and adapt them to real organisational constraints.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Sprint simulations, Kanban board exercises, backlog workshops, role plays and discussion of agile adoption challenges.

Course objectives

By the end of this course, participants will be able to:
• Explain agile values and principles
• Apply Scrum roles, events and artefacts
• Manage flow with Kanban boards and limits
• Write and prioritise user stories
• Estimate and plan releases
• Combine agile delivery with governance and reporting

Target audience

This course is suitable for:
• Project managers
• Team leaders and scrum masters
• Product owners
• IT and digital team members
• PMO staff
