Why attend

Microsoft Power Platform lets business users automate approvals, build simple apps and create dashboards without traditional coding. This practical course introduces Power Automate, Power Apps and Power BI, showing participants how to design useful solutions, connect to common data sources, follow governance rules and hand solutions over safely.

Small automations built by the people who know the work can save significant time. You will learn to build them properly, with good design and within IT governance.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Guided hands-on building exercises, solution design clinics, governance discussions and a final mini-project based on participants' own processes.

Course objectives

By the end of this course, participants will be able to:

- Describe the components of Power Platform
- Build automated workflows and approvals
- Create simple data-entry and tracking apps
- Build basic reports and dashboards
- Connect to common data sources securely
- Follow governance and support good practice

Target audience

This course is suitable for:

- Business analysts and process owners
- Administrative and operations staff
- Team leaders seeking automation
- HR, finance and procurement professionals
- Citizen developers

Course content
