Why attend

Conversational AI can resolve routine customer questions instantly, around the clock, and free agents for complex cases. This course explains how modern chatbots and voice assistants work, how to choose use cases, design conversations, connect bots to knowledge and back-end systems, hand over smoothly to humans and measure customer outcomes.

Poorly designed bots frustrate customers and damage brands. You will learn to design conversational experiences that customers actually like using.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Bot demonstrations, conversation design workshops, testing exercises and case studies from banks, airlines and utilities.

Course objectives

By the end of this course, participants will be able to:

- Explain how chatbots and generative AI assistants work
- Select suitable customer service use cases
- Design natural and effective conversations
- Connect bots to knowledge bases and systems
- Design human handover and escalation
- Measure containment, satisfaction and quality

Target audience

This course is suitable for:

- Customer service and contact centre managers
- Digital channel managers
- CX and service designers
- IT and automation professionals
- Knowledge management teams

Course content

Target competencies

Participants will develop competencies in:

- Conversation design
