Why attend

Extreme heat, floods, storms and water scarcity increasingly disrupt operations and supply chains. This course helps organisations adapt: climate hazard assessment, vulnerability of sites and supply chains, adaptation options, resilient design, insurance, integrating adaptation into planning and investment and engaging stakeholders.

Climate impacts are already affecting businesses. You will learn to assess vulnerabilities and plan practical adaptation.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Climate data exercises, site vulnerability assessments, adaptation option workshops and case studies.

Course objectives

By the end of this course, participants will be able to:

- Assess climate hazards relevant to operations
- Evaluate vulnerability of sites and supply chains
- Identify adaptation options
- Integrate resilience into design and investment
- Use insurance and risk transfer for climate risks
- Build an adaptation plan with stakeholders

Target audience

This course is suitable for:

- Sustainability and risk managers
- Facility and asset managers
- Business continuity managers
- Strategy and finance professionals
- Public sector planners

Course content

Target competencies

Participants will develop competencies in:

- Hazard assessment
- Vulnerability analysis
- Adaptation planning
- Investment integration
- Stakeholder engagement
