Why attend

Energy, water, transport, telecoms and healthcare infrastructure are essential to society and attractive targets. This course covers critical infrastructure protection: identifying critical assets and interdependencies, threat assessment including cyber-physical risks, protective measures, resilience, regulation and public-private cooperation.

Failure of critical infrastructure can cascade across society. You will learn approaches used to protect and strengthen it.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Interdependency mapping, threat scenarios, case studies and resilience planning.

Course objectives

By the end of this course, participants will be able to:
- Identify critical assets and services
- Map infrastructure interdependencies
- Assess physical and cyber threats
- Select protective and resilience measures
- Understand regulatory frameworks
- Strengthen public-private cooperation
