Why attend

Many finance teams still need two or three weeks to close the books, leaving little time for analysis. This course shows how leading organisations close in days by redesigning the close calendar, standardising reconciliations, reducing manual journals and using automation and reporting tools. Participants map their own close process and leave with a practical acceleration plan.

A faster, cleaner close frees finance to support decisions instead of chasing numbers. You will learn proven techniques to remove bottlenecks, improve accuracy and introduce automation without losing control.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Participants map their current close, analyse bottlenecks in groups, review automation demonstrations, benchmark against good practice and build a close improvement roadmap.

Course objectives

By the end of this course, participants will be able to:
• Map the end-to-end financial close and identify bottlenecks
• Design a close calendar with clear ownership and deadlines
• Standardise reconciliations and journal processes
• Apply automation and robotic tools to repetitive close tasks
• Strengthen controls while reducing cycle time
• Build a roadmap for continuous close improvement

Target audience

This course is suitable for:
• Financial controllers and finance managers
• Group reporting and consolidation teams
• Accounting team leaders
• Finance transformation professionals
• Internal auditors reviewing the close
• Shared service centre managers

Course content

Target competencies

Participants will develop competencies in:

- Process mapping
- Close management
- Finance automation
- Control design
- Continuous improvement
