Course content

Why attend

Organisations are exposed to financial risks from changes in interest rates, exchange rates, commodity prices, counterparty failures and liquidity shortages. This course provides a comprehensive framework for identifying, measuring and managing financial risks. Participants learn risk measurement tools such as sensitivity analysis, value at risk and stress testing, as well as governance, limits and reporting.

Unmanaged financial risk can wipe out operating profits or threaten survival. This course helps you understand exposures and implement practical risk management processes that protect your organisation.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course combines conceptual explanation with spreadsheet risk measurement exercises, case studies of financial risk events and policy design workshops.

Course objectives

By the end of this course, participants will be able to:
- Identify market, credit and liquidity risks in an organisation
- Measure exposures using sensitivity, VaR and stress testing
- Manage counterparty credit risk
- Assess and manage liquidity and funding risk
- Design risk policies, limits and governance
- Report financial risks clearly to management and boards

Target audience

This course is suitable for:
- Risk managers
- Treasury and finance professionals
- CFOs and financial controllers
- Bankers and investment professionals
- Internal auditors

Course content

Target competencies

Participants will develop competencies in:

- Risk identification
- Risk measurement
- Stress testing
- Liquidity management
- Risk governance
- Risk reporting

Course outline

Day 1: Financial Risk Overview

09:00–09:54	Types of financial risk
