Why attend

Fire protection systems must work perfectly when needed but are rarely used. This course covers fire detection and alarm systems, sprinklers, fire pumps, gas suppression, extinguishers, hydrants and emergency lighting, inspection and testing frequencies, maintenance practices, impairment management and compliance records.

Poorly maintained fire systems can fail during emergencies. You will learn inspection and maintenance practices that keep them ready.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

System walkthroughs, inspection checklist development, impairment scenarios and case studies.

Course objectives

By the end of this course, participants will be able to:
• Explain fire detection and suppression systems
• Plan inspection and testing schedules
• Maintain sprinklers, pumps and suppression systems
• Manage fire system impairments safely
• Keep compliance records
• Coordinate with authorities and insurers

Target audience

This course is suitable for:
• Facility managers
• Fire safety officers
• Maintenance technicians
• Building services engineers
• HSE professionals

Course content
