Why attend

The NIS2 Directive significantly expands the number of organisations in the EU that must meet cybersecurity risk-management and incident-reporting obligations, and it makes management bodies directly accountable. This course explains which entities are in scope, the essential and important entity categories, required security measures, incident reporting timelines, supply chain security, supervision and penalties. Participants learn how to assess their position, close gaps and build a cybersecurity governance programme that satisfies regulators and improves resilience.

Many medium and large organisations in sectors such as energy, transport, health, digital services, manufacturing and public administration now fall under NIS2. This course helps you understand your obligations and turn them into a practical, risk-based cybersecurity compliance programme.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course includes expert explanation, scoping exercises, gap-assessment workshops, incident reporting simulations, supply chain security case studies and roadmap development. It provides practical guidance and does not constitute legal advice.

Course objectives

By the end of this course, participants will be able to:
• Explain the objectives, scope and sectors covered by NIS2
• Determine whether an organisation is an essential or important entity
• Implement the required cybersecurity risk-management measures
• Manage incident detection, classification and reporting
• Address supply chain and supplier security requirements
• Build a NIS2 compliance and governance roadmap

Course content
