Why attend

For most companies, the majority of greenhouse gas emissions sit in their supply chain. This course shows procurement and sustainability teams how to measure and reduce scope 3 emissions: screening categories, collecting supplier data, setting supplier targets, low-carbon sourcing, supplier engagement programmes and reporting progress.

Customers and regulators increasingly expect action on supply chain emissions. You will learn a practical approach that procurement can lead.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Calculation exercises, supplier engagement planning, case studies and reporting workshops.

Course objectives

By the end of this course, participants will be able to:
• Explain scope 3 categories and their relevance
• Screen and prioritise supply chain emissions
• Collect and improve supplier emissions data
• Set supplier reduction targets
• Integrate carbon into sourcing decisions
• Report scope 3 progress

Target audience

This course is suitable for:
• Procurement and category managers
• Sustainability managers
• Supply chain leaders
• Supplier relationship managers
• ESG reporting teams

Course content
