Why attend

Pandemics, conflicts, extreme weather and supplier failures have shown how fragile supply chains can be. This course teaches scenario planning for supply chain disruption: mapping critical supply networks, identifying vulnerabilities, building disruption scenarios, stress testing, designing mitigation options and creating response playbooks.

Organisations that rehearse disruptions recover faster. You will learn to prepare your supply chain before the next crisis.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Network mapping exercises, scenario workshops, stress-test simulations and case studies of recent disruptions.

Course objectives

By the end of this course, participants will be able to:
• Map critical supply networks and dependencies
• Identify single points of failure
• Build plausible disruption scenarios
• Stress test supply chain plans
• Evaluate mitigation options
• Create disruption response playbooks

Target audience

This course is suitable for:
• Supply chain managers
• Risk managers
• Procurement leaders
• Operations and planning managers
• Business continuity professionals

Course content

Target competencies

Participants will develop competencies in:

- Network mapping
- Scenario building
- Stress testing
- Mitigation design
- Response planning
