Why attend

Projects increasingly must deliver environmental and social outcomes alongside time, cost and quality. This course shows how to integrate sustainability into project management: setting sustainability objectives, assessing environmental and social impacts, sustainable procurement and design choices, carbon measurement on projects, and reporting sustainability performance.

Clients, investors and regulators now expect sustainable delivery. You will learn practical ways to embed sustainability throughout the project life cycle.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Case studies, impact assessment exercises, sustainable procurement workshops and carbon calculation practice.

Course objectives

By the end of this course, participants will be able to:
• Explain sustainability principles relevant to projects
• Set sustainability objectives and indicators
• Assess environmental and social impacts
• Apply sustainable design and procurement
• Measure project carbon footprint
• Report sustainability performance

Target audience
