Why attend

Efficient warehouses depend on good layout, slotting and processes. This course covers warehouse operations from receiving to dispatch: layout and flow design, storage systems, slotting, picking methods, labour planning, warehouse management systems, safety and performance measurement.

Small layout and process changes can significantly increase warehouse productivity. You will learn to design and run efficient warehouses.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Layout design exercises, picking simulations, case studies and KPI workshops.

Course objectives

By the end of this course, participants will be able to:
• Design warehouse layouts for efficient flow
• Select suitable storage and handling equipment
• Apply slotting principles
• Choose picking methods for different profiles
• Plan labour and use warehouse management systems
• Measure warehouse performance and safety

Target audience

This course is suitable for:
• Warehouse managers and supervisors
• Logistics managers
• Distribution centre staff
• Supply chain engineers
• Operations managers

Course content

Target competencies

Participants will develop competencies in:

- Layout design
- Process optimisation
- Labour planning
- Systems use
- Performance measurement
