Why attend

Reducing waste and keeping materials in use saves money and reduces environmental impact. This course covers waste management and circular economy practices: waste hierarchy, waste audits, segregation and recycling, legal duties, circular design, reuse and remanufacturing, supplier and customer collaboration and measuring circularity.

Waste is lost value. You will learn practical ways to reduce waste and move towards circular operations.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

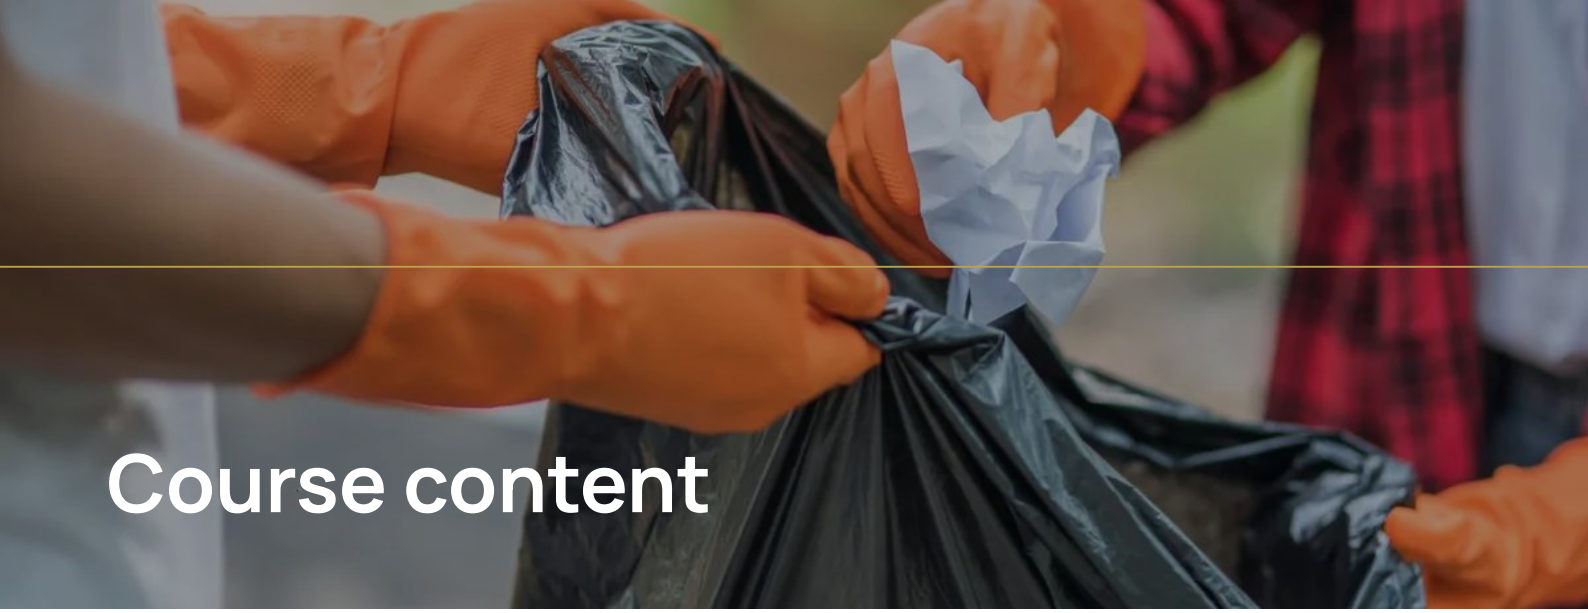

Waste audit exercises, circular design workshops, case studies and improvement planning.

Course objectives

By the end of this course, participants will be able to:
- Apply the waste hierarchy
- Conduct waste audits
- Improve segregation, recycling and disposal compliance
- Apply circular design principles
- Develop reuse and take-back schemes
- Measure waste and circularity performance
