Why attend

Welding procedures and welder qualifications ensure welds meet required strength and quality. This course explains welding procedure specifications, procedure qualification records, essential variables, testing requirements, welder performance qualification, applicable codes and managing welding documentation on projects.

Unqualified procedures lead to rejected welds and failures. You will learn how qualification works and how to manage it.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Code walkthroughs, WPS and PQR review exercises, case studies and documentation workshops.

Course objectives

By the end of this course, participants will be able to:
• Explain the purpose of welding procedure qualification
• Read and prepare welding procedure specifications
• Understand procedure qualification records and tests
• Identify essential and non-essential variables
• Manage welder performance qualification
• Control welding documentation on projects

Target audience

This course is suitable for:
• Welding engineers and inspectors
• Quality engineers
• Fabrication supervisors
• Project engineers
• Maintenance engineers

Course content

Target competencies

Participants will develop competencies in:

- Code interpretation
- Procedure development
- Testing requirements
- Qualification management
- Documentation

Course outline

Day 1: Welding Qualification

09:00–10:08	Why qualify procedures
